United way Bengaluru

Problem Statement

1

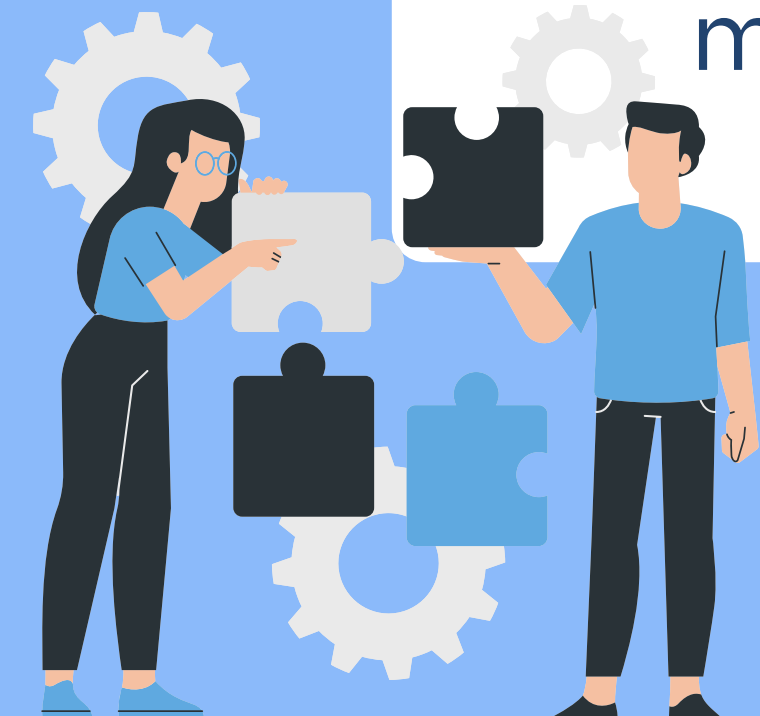

Process of recording data from field coordinators is completely manual

2

No tool available to visualise the recorded data

3

No method to create custom forms for specific programs

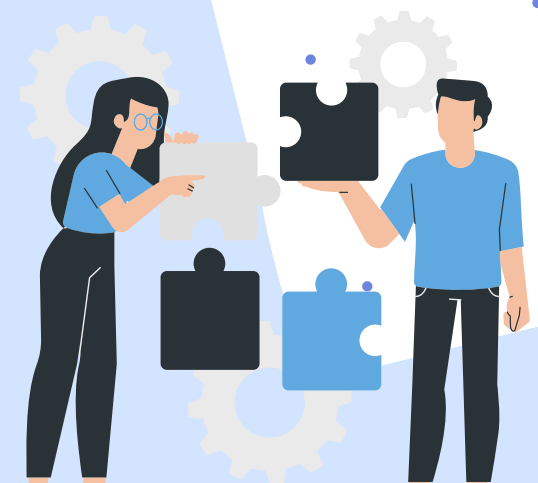

Solutions Proposed

System to allow field coordinators to enter data on a regular basis

Visualisation of various metrics and data for both the leadership and donors

System to automate creation of custom forms and milestones for specific programs

Key Points

Donation Tracking

Program Template Creation

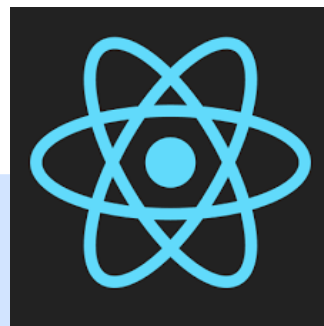

Visualisations

Field Coordinator Provisions

Tech Stack

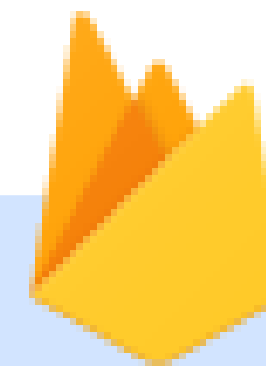

ReactJS

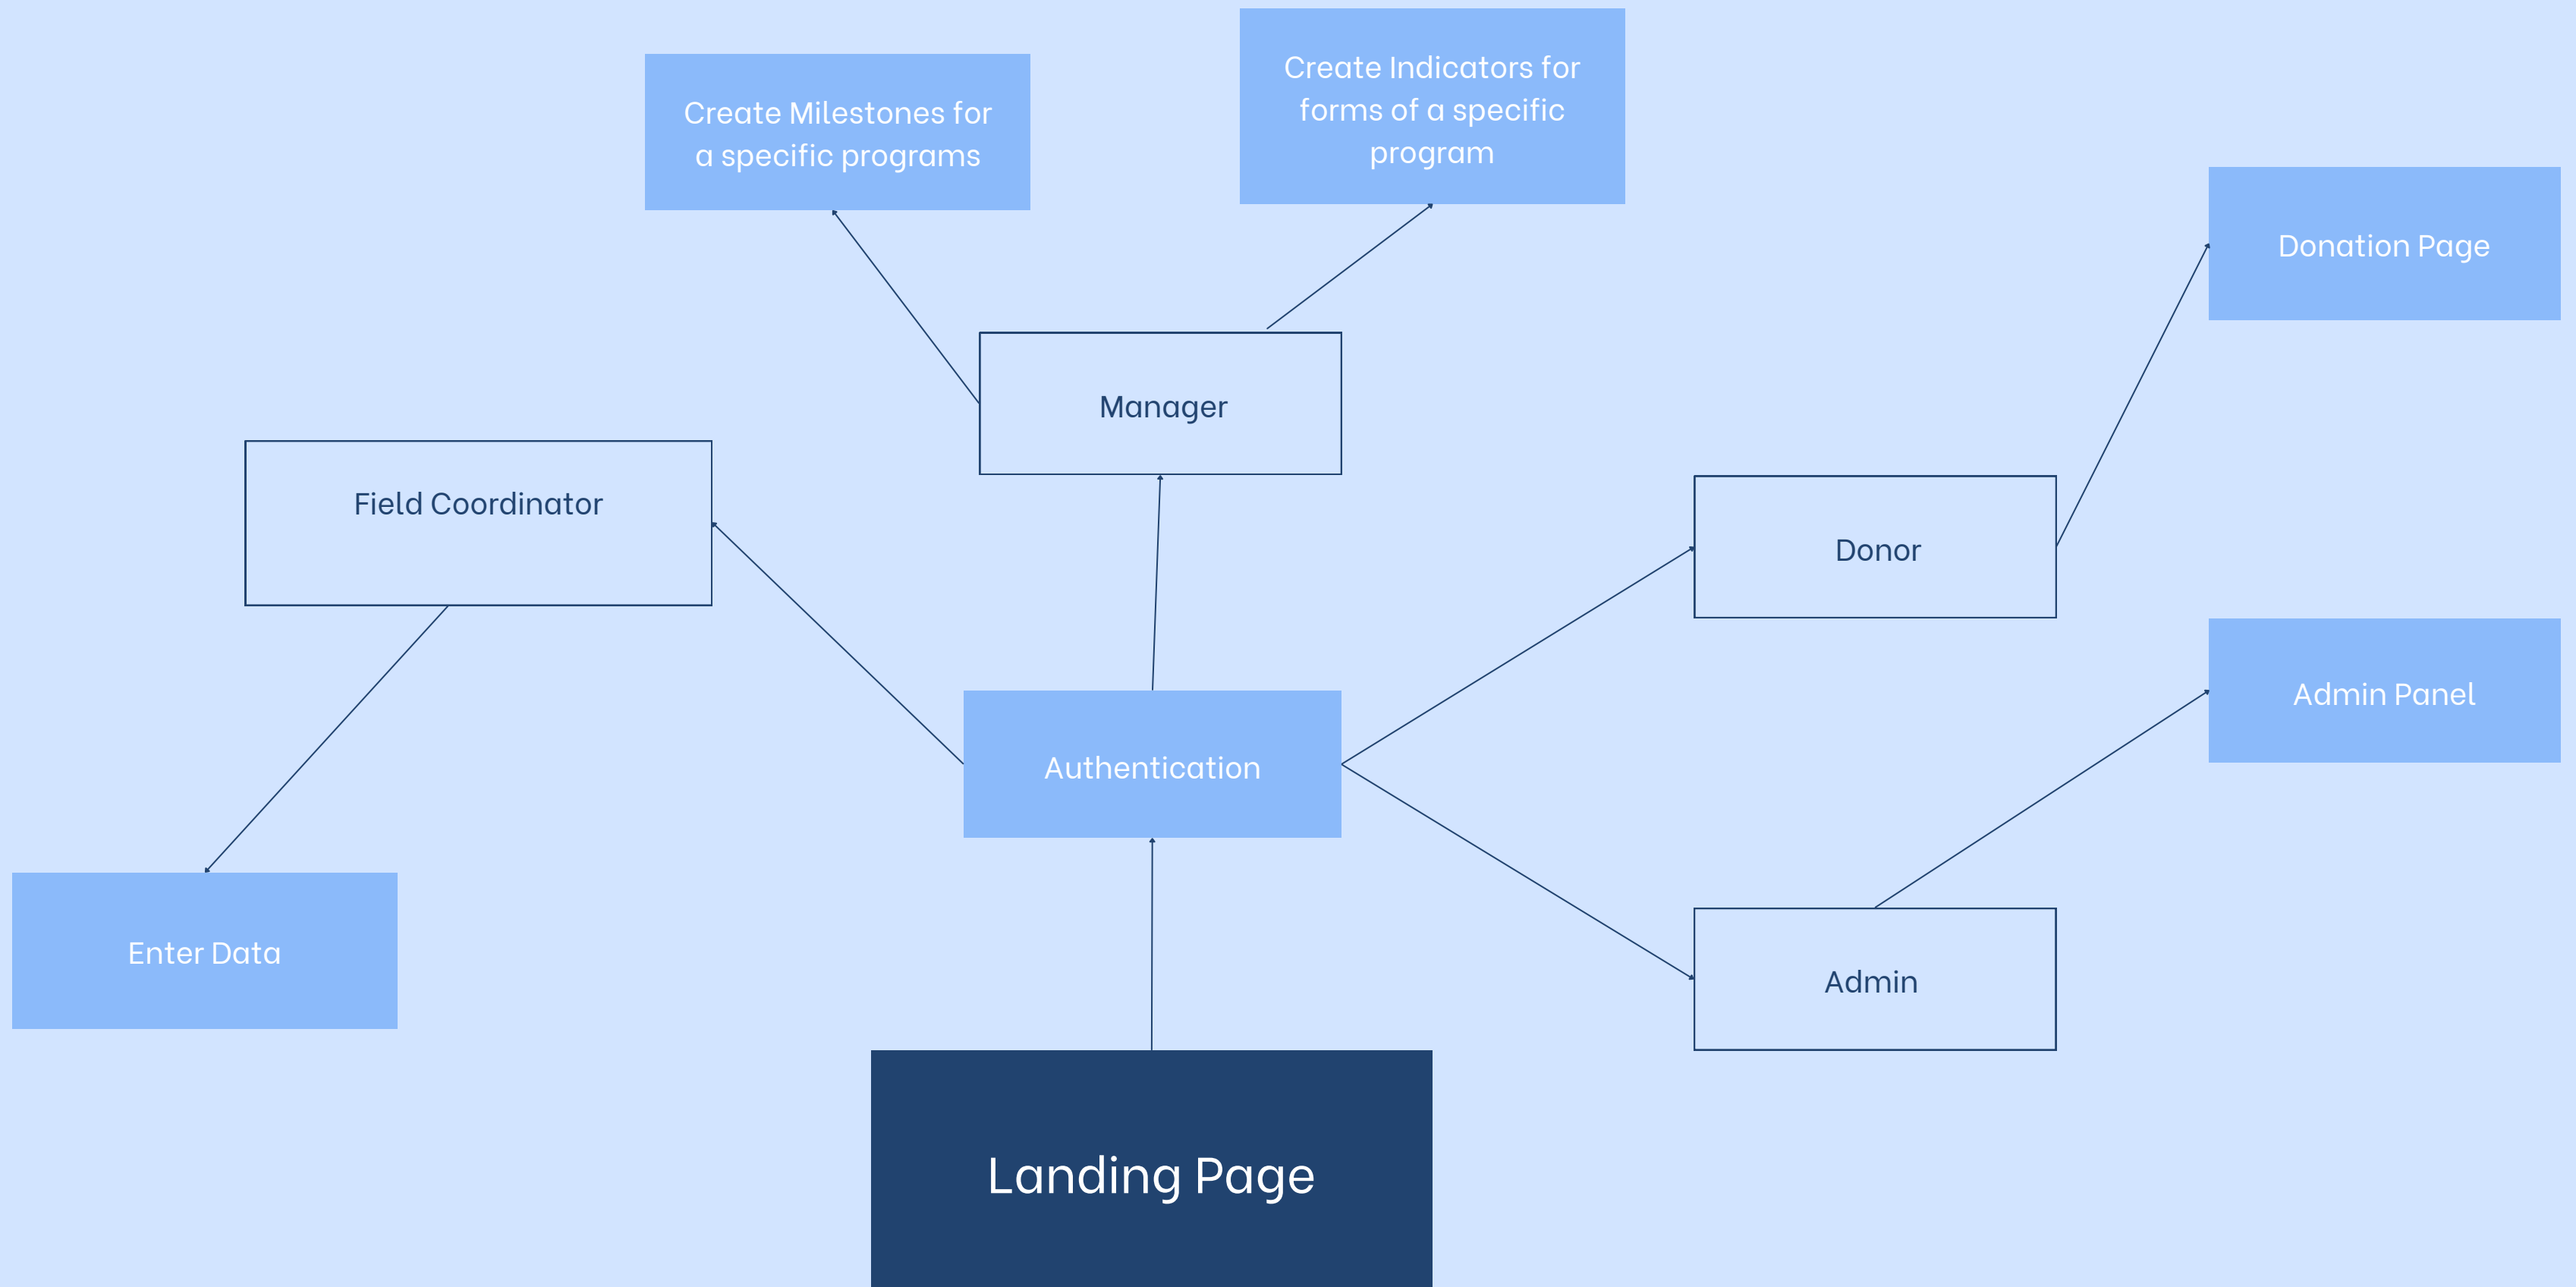

An open-source front-end JavaScript library for building user interfaces based on UI components.

Firebase

A set of tools offered by Google to build excellent scalable applications in the cloud.

Future Scope

Payment
Gateway for
donations

Granular
Visualisations
